

Pework Guide:

SDA SEB - (2025)

Pre-Work Details

This is the official prework of the Software Engineering Bootcamp Program. This prework serves as the foundation for the Software Engineering Bootcamp Program. It introduces essential tools, languages, and concepts required to succeed in the program. The modules are designed to provide a hands-on, step-by-step introduction to web development fundamentals, ensuring students have a strong grasp of core skills before advancing to more complex topics.
